

Calculus BC Final Project

Due: Monday, May 23

In groups of 1-3 people, choose one of the following projects to present:

1. Put together a 10 minute lesson on a Calculus III topic
2. Creative project. Here are some ideas:
 - Write a song about calculus (original or parody)
 - Create a piece of visual art that demonstrates/utilizes calculus concepts
 - Write an original piece of poetry or short story about calculus

I'm willing to entertain other ideas, but they must be cleared with me first.

The project is worth **30 pts** and will go into the **Quiz** category
