

Mt. Wilson Observatory

Go to the Mt. Wilson Observatory and take a digital camera along with a note book. Entrance is FREE, unless you want to do the guided tour. Take pictures of at least 5 displays or telescopes with you in the picture. Write up a description of what you learned at each display and place the image of the display next to the description. All students who do this project must tell me about the 60-ft Tower (where Mr. Fulmer used to work). Check it out and tell about the research being done there. The 60-ft Tower does NOT count as one of your 5 required exhibits.
