

Semester II Review Project

- Each pair will present a review of a particular topic from the Spring Semester
- Each presentation should be **12 - 15 minutes** and include the following:
 1. A review of the concepts
 2. At least 6 common mistakes or misconceptions relevant to the topic
 - Explain how to avoid each of them
 3. Five original practice multiple choice questions for the class
 - Explain the answers to each question. What do you want the class to retain from your practice problems?
 - Optional: use resources such as www.polleverywhere.com to create interactive MC questions
- Everyone in your group must talk
- Presentations will be composed on Power Point, Google Slides, or a similar program, but feel free to use the white board to your advantage

Topics for Review:

- Gravity, Waves, Electrostatics, Electricity, Magnetism
